

Discovery Call Notes - Northfield Retail Group

Contact: Anjali Rao, VP of Operations.

The operations team currently reconciles new service requests manually every Friday before assigning work to delivery staff. Store managers have asked whether the dashboard could highlight the three highest-discrepancy locations each week so regional managers can prioritize site visits.

Company: Northfield Retail Group. Needs: centralize the weekly reconciliation and discrepancy-flagging process described above. Goals: cut the Friday manual-reconciliation time to near zero and get regional managers acting on discrepancies faster. Recommended services: reconciliation dashboard, top-3-discrepancy weekly highlight, regional manager alerting.
